

CORTICAL ELECTRODES

FOR CORTICAL EEG RECORDING AND FUNCTIONAL MAPPING

- ◆ Contact diameter 2.5 mm
- ◆ Thickness 0.7 mm
- ◆ Width of strips 10 mm
- ◆ Distance between the contacts 10 mm
- ◆ Pre-cut grid or strip, to adapt to the areas to explore
- ◆ Thin and flexible
- ◆ Numbering of contacts
- ◆ Good tensile strength
- ◆ Platinum/iridium
- ◆ Single-use sterilised item, delivered with blue connection holder

Made of silicone, the cortical electrode adapts perfectly to the areas to explore.

| | Nr of contacts per strip | grid 8 strips | grid 7 strips | grid 6 strips | grid 5 strips | grid 4 strips | grid 3 strips | grid 2 strips | 1 strip |

Bold character references correspond to most current models available in stock.

- ◆ Connection with blue extension cables **PCP-16**** and adapters **ADP****, or connection cables **CBL**** enabling to connect 1 or 2 strips
- ◆ Colour coding for the identification of the connectors after implantation
- ◆ Tunnelable connectors

EXTRA BLUE CONNECTION HOLDER SCC-08S-10

- ◆ Single-use sterilised item, individually packed, delivered per lot of 10
